学习学术写作语体要求

学习议论文破题： 题目类型、 主题词替换和罗列论据

难点： 找二元类大作文的论据

Task 2 scripts are assessed on the following criteria:

Task Response	task fulfillment; clear position; arguments; supports to arguments
Cohesion and Coherence	organization; arrangement; paragraphing; cohesive features
Lexical Resources	topic-related vocabulary; modifiers; flexibility, collocation; less common words (3 syllable),
Grammatical Range and Accuracy	error-free sentences; range of structures; length & complexity (subordinate structure) , style appropriateness, modals; punctuation

雅思写作文体总体要求： 正式或半正式（**formal or semi-formal**）

准确\不过于极端（**do not over-generalize**）

Ex1: Form groups of three people. Take turns to translate these rules into Chinese.

Writing in a formal style:

The style of academic writing is quite different from that of an ordinary English composition or that of an oral presentation. As its objective is to inform rather than entertain, an academic essay is characterized by objectivity and preciseness. To achieve the purposes, formality is an important element of a research paper. A formal style is characterized by the following features.

- 1) Use academic and formal words such as *deteriorate, positive, negative, offspring* and *manager* instead of colloquial expressions like *get worse, good, bad, kids* and *boss*.
- 2) Avoid using too many phrasal verbs if there are suitable synonyms. For example, do not use *go on, speed up* and *bring up*; use *continue, accelerate* and *raise*.
- 3) Avoid using general and vague words and expressions such as *lots of* (use *a significant proportion of* or *a considerable number of*), *like* (use *such as* or *for instance*) and *thing* (use *factor, issue* or *topic*) And avoid words like *every, all, none, nothing, best* and *worst*, as these are hard to prove.
- 4) Avoid the use of the second person pronouns such as *you* and *your*, which make your writing sound as if you are addressing readers orally. Minimize the use of the first person pronouns such as *I* and *we*, though *I* and *we* are becoming acceptable. Try to use the third person pronouns and passive constructions to avoid personalization. Compare: *We can see the changes in our society*→*The changes can be seen in society*.
- 5) Avoid contractions (e.g. *it's, isn't, don't, you're, shouldn't*) which are considered too informal and conversational for academic writing; use the full form such as *do not, cannot* and *should not*.
- 6) Avoid personal and emotional expressions such as *luckily, remarkably, surprisingly, terrible, ridiculous* and *devastating* as these affects the tone and make your writing more sensational like news reporting.

Instead impersonal expressions are preferred.

- 7) Do not start a sentence with coordinating conjunctions such as *and*, *but*, *so* and *also*.
- 8) Avoid rhetorical questions such as *How can we engage students in learning?* Change it to: *There are several practical strategies to engage students in learning.* The self-answered questions are great in presentations, not in academic writing.
- 9) When listing items, avoid using *etc.* or *and so on* which looks incomplete and weak. Insert *and* before the last item. Compare: *There are many causes of student exhaustion, such as poor diet, part-time work and so on.* → *There are many causes of student exhaustion, such as poor diet, part-time work and stress.*
- 10) Use conjunctions and signpost expressions to introduce new sections such as *firstly*, *moreover*, *in addition* and *turning to the question of*.
- 11) Avoid using a series of short sentences. Instead, use subordinate clauses and nominal phrases.
- 12) Avoid cliché and idioms such as *silver lining* and *paint a picture*, which, commonly used in informal speech, will make the tone of your paper less formal and can trivialize your argument.
- 13) Try to use nominalization instead of verbs. Compare: *The audience **believed** that **using** cleaning products **affected** the environment negatively.* → *The **belief** of the audience was that the **use** of cleaning products had a negative **effect** on the environment.*

Ex2: 改写下列句子，使其符合学术写作语体要求

1. If you use computers, you will easily get information.
2. I think traditional face-to-face teaching will definitely be replaced by internet-based learning.
3. In many cities of the world, traffic jams and air pollution become more and more serious. This is because more and more private cars are used.
4. Then how do modern communication tools benefit us? Let's look at 3 aspects.
5. Just as they say, every coin has two sides. So, advertisements have both advantages and disadvantages.

Ex3. 下面这道题是剑桥EAP考试写作的第三题,请根据指令完成它。

ACADEMIC OBJECTIVITY

Academic objectivity means that the main emphasis should be on the information you convey and the arguments you are making rather than on you. Rewrite the following paragraph so that it conforms to the stylistic conventions of academic objectivity:

We don't really know what language proficiency is but many people have talked about it for a long time.

Some researchers have tried to find ways for us to make teaching and testing more communicative because

that is how language works. I think that language is something we use for communicating, not an object for

us to study and we remember that when we teach and test it.

所有议论作文出题方式：

Opinion 1+Opinion 2+Question

(Fact)+Opinion+Question

Task		Timing	What do I have to do?
Academic Writing	1	20 minutes	Describe visual information (e.g. a diagram, chart, graph or table).
	2	40 minutes	Write an essay. You may be asked to: • provide a solution • evaluate a problem • compare and contrast different ideas or opinions • challenge an argument or idea.

1.2 Read statements 1-6 carefully and make sure that you understand them. Then match the statements to questions A-E.

1. Children have to be educated, but they also have to be allowed to learn things for themselves.
2. "Advertisements spoil our enjoyment of today's entertainment" "I think the adverts are often more interesting than the programmes they interrupt."
3. The world would be a happier place if we all enjoy our work.
4. Computers allow us to stay connected with each other. However, they also encourage people not to go out and socialize.
5. Some countries increase inner-city traffic by increasing public transport. Others impose a tax on people

who drive in the city.

6. Nowadays, more people are travelling to remote places, spreading their own language and culture as a result.

A. What are the advantages and disadvantage of each system?

B. Discuss both statements and give your own opinion?

C. To what extent do you think this is a positive trend?

D. How realistic do you think this is?

E. To what extent do you agree or disagree with this view?

Planning and organizing your ideas

Before you begin to write, it's important to make a plan. If you don't do this, your ideas will be disorganized and you will lose marks.

2.1 Look at the statements from 1.2 again.

1. For statements 1.3 and 6, decide how much you agree
2. For statements in 2.4 and 5, decide which one you agree with.
3. For each of the statements in 1.2, explain why you agree or disagree. Then give your own opinion on the topic.

2.2 Study the following Writing Task 2 question.

The Internet allows us to stay connected with each other no matter where we are. On the other hand, it also isolates us and encourages people not to socialise.

To what extent do you agree or disagree with these statements?

Give reasons for your answer and include any relevant examples from your own knowledge or experience.

The final part of the question is very important. It tells you what you must include in your answer.

You **must** include

- your own opinion about the statements.
- the reasons for your opinion.

You **can** include

- examples from your own personal experience. **BUT** these must be relevant to the question.

2.4 You will lose marks if you include ideas that are not relevant to the question. Look at these ideas that a candidate noted to answer the questions in 2.2. Cross out four ideas that are not relevant to the task and should not be included.

1. Instant communication (e.g. emails/text messages) means that it is difficult to escape from work.
2. The internet makes it easier to do your homework.
3. In my company, computers have replaced many staff and have caused more unemployment.
4. A friend of mine uses a social-networking site a great deal but we rarely see her.
5. Virtual friends made on the internet cannot be compared to our actual friends and family.
6. I learned to type using a computer programme, these programmes make it easy to understand computers

7. My cousin travelled for a year but kept in touch with his family every day.
8. With more and more technological advances, our society will continue to develop faster and faster.
9. Through the internet, we can share memories with people who are far away.

Argumentative essay: 议论文

2. 找元和换元

元(文章主题词): protection of wild animals\ animal conservation
protecting wildlife\ protection of endangered species
换元可以换同义词, 换词性, 换下义词

换元：

live on campus: **live at home:**

5

Some people think money spent on the protection of wild animals is a waste, others think the need to do so is urgent. Discuss both views and show your opinion.

eco-balance	biological resources	inspire human inventions
drain much needed public funds	compete for space & resources	

Some people think advertising plays an important role in commerce. Others, however, think that they bring about many problems. Discuss both views and show your opinion.

Some people say that the government should provide sports facilities to improve public health. However, others believe that this has little effect, other measures should be used for the purpose. Discuss both these views and give your personal opinion.

provision of sport facilities	other measure
immediately available: be willing to	be not only induced by insufficient exercises
sedentary lifestyle (久坐的生活方式), be directly responsible for, back pain, muscle strain (肌肉疼痛), slip of disks(腰椎间盘突出), office-based work,	be hereditary(遗传的), run in family gene, be prevented by pre-natal(出生前的) medical check
obesity(肥胖), weight problems	pollution: atmospheric pollution, lung cancer, asthma (哮喘)
improve immune system (免疫能力), be defensive to diseases, communicable disease, epidemics (传染病)	dietary habits: 1/2 human diseases, fatty liver, smoking, drinking,

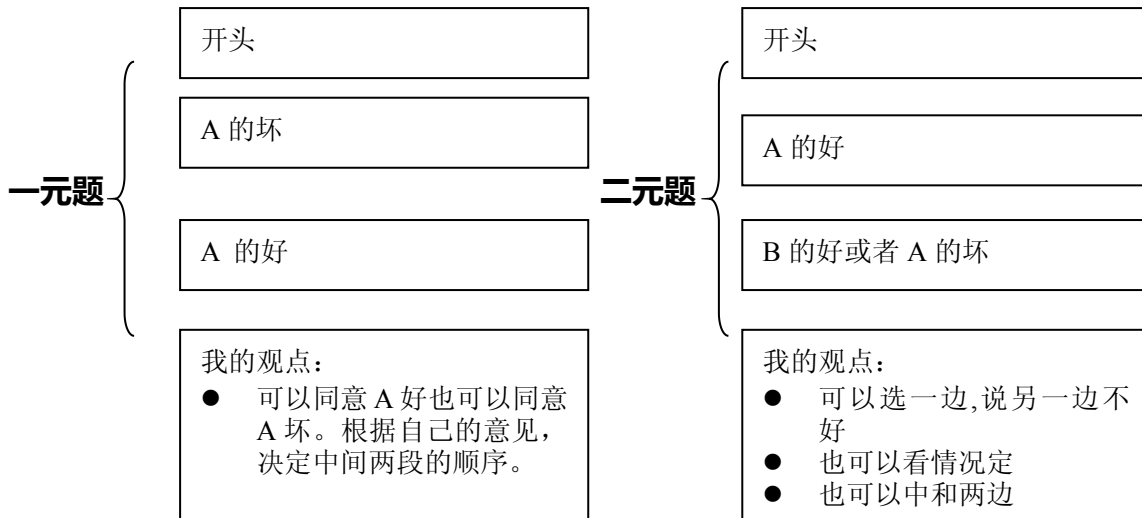

Some people think college students should live on campus, others think they should live at home. Which do you agree?

Live on campus	Live at home

More and more women go out to work. Therefore, some people think it is the government' s responsibility to provide staff and facilities to look after children of working mothers, free of charge. To what extent do you agree with this opinion?

平衡讨论作文

写一元题 (一个问题的好坏两面)
on the one hand\ on the other hand
on the upside\on the downside

Sth does trigger problems \ on a positive note, however, it also brings forth benefits
Sth involves benefits \ However, attending these benefits are problems
Something has positive implications on...\ Nonetheless, these positive effects are accompanied by some risks.
The merits of sth are concomitant with\of demerits.

写二元题 (两个事物相对比)
admittedly\ despite this
undoubtedly\ that being said
indeed\ nonetheless

层次型

首先	- first and foremost, - firstly - above all, - to start with - to begin with - to commence - in the first place
其次	- furthermore\ moreover - in addition\ additionally - besides\ also - on top of that\ as well as that
换个角度看	- 从某个方面看 - on a different note\ on another note - from another perspective - in a different sense - as far as sth/sb. is concerned, - as far as sth goes - turning to sth. - when it comes to sth' - as for sth/ as to sth - n-wise, - 对某人而言 - on the part of sb. - as to sb. \ as for sb. - as far as sb. is concerned
更重要 同样重要	- more importantly - equally importantly - most importantly - especially importantly
更糟糕的是	- worse still - to make matters worse,
同时	- simultaneously - in the meantime - meanwhile
最后	- last but not least - ultimately - finally - in the end

范文分析：

Some people think that we need to focus more on **preventing climate change**, while others think finding a way to live with it is more important. Discuss both views and give your own opinion.

Certainly, some feel that we should place more focus on the **prevention of climate change**, while others believe we should devote our resources to **tolerating it**. In this essay, I will explain why I tend to agree with the former.

I concede that there may be reasons why it is necessary to **live with certain impacts**, and perhaps the most obvious one is some changes have already happened and do not appear to be **reversible**. By failing to address this problem sooner, countries have discovered some damage is now permanent, and this means it may well be more **pragmatic** to deal with the effects and **invariably** more cost effective. For example, many Pacific Island nations, which are **typically** in low-lying areas, have experienced sea level rises, forcing them to relocate coastal communities, and this clearly is a priority for them.

Nevertheless, I feel that we need to prioritise **prevention**. One reason for this is governments **arguably** have a moral obligation to preserve the planet for future generations. If they introduce strict regulations to reduce harmful greenhouse gases, they can force pollution emitting industries to become **carbon neutral**, in turn limiting and possibly **arresting** global warming. What this can do is **potentially** restoring balance to many ecosystems. Another compelling reason is that a lack of prevention could be **catastrophic**. Hurricanes, for instance, which are increasing in intensity and frequency, cause immense destruction. As such, they displace millions, causing famine and disease, and **crippling** economies, which is ultimately why trying to stop further devastation is imperative.

Overall, I believe that although we have to **live with climate change** to some extent, we should focus more on **preventing** it.

请照着上面的方式自己分析以下范文

Government funding to universities should be only provided as scholarships for the best students in universities. All other funding to universities should come from student fees and private organisations. To what extent do you agree or disagree?

It is true that there are differing views about university funding. In this essay, I will explain why I believe that while supporting gifted students is positive, it is not advisable for governments to make universities finance themselves solely from private sources.

I admit that providing public funds to high performing students is a good idea, and this is chiefly because it allows governments to retain and employ talent for the public good. For example, in some Australian universities scholarships come with condition that the student work for a time in a public institution, such as CSIRO, meaning these bodies maintain a high level of expertise, and this, clearly, benefits the country as a whole. By doing this, governments can justify assisting students with public money, and ensure that their countries can remain internationally competitive and arguably at the forefront of innovation.

Nevertheless, I disagree that this should be the only form of government support for universities. One reason for this is that I believe strongly in the principle of access to education, and therefore the state should pay institutions to accept students from poor backgrounds. When governments reduce and even eliminate fees in this way, they enable more people to attend, in turn invariably raising education levels. What this also does is to create a fairer and more equitable society. Another is that funding from private organizations may not always be ethical. Large pharmaceutical companies, for example, typically donate heavily to universities. As such, there is the potential for them to influence research projects and even results to favour their products, which, in my view, is dangerous and certainly not in the public interest.

Overall, I believe that, although government support for talented university students is positive, this should not be the state's only support for tertiary education systems.

结构范文:

一元: 平衡式

Some people think food has been changed by technological advances and this is an improvement while others worry that is harmful. Discuss both these views and give your own opinion.

Science and technologies played unmatched roles in human development. This is especially evident in the sphere of food production and processing. **Although some problems involved in the adoption of scientific methods in food production can be worrisome, farmers, producers and consumers reap plentiful advantages from cutting-edge science.**

A chain of problems arise from the expansive use of technologies in food production. **First and foremost,** soil becomes less nourishing as a result of over-using chemical fertilizers which also contaminate water-bodies owing to irrigation. **Worse still,** animals (fishes, frogs and birds) are disappearing from the countryside, for the reason that insecticides used to improve productivities of crops are equally poisonous to helpful species. **Simultaneously,** scientifically processed food inflicts harm on human health. Evidence shows that a large amount of food additives like food coloring and preservatives are carcinogens and GM food is found to be directly responsible for the rise of tumor risks.

Despite these possible side-effects, the advantages brought by modern technologies in farming and food processing are significant. **In the first place,** the application of heavy machinery combined with the use of chemical fertilizers greatly boosts agricultural yields. Given the contradiction between the ever-growing world population and the loss of arable land to construction as well as soil erosion, high yields guarantee a constant food supply, thus lowering the possibility of famine and social chaos that usually ensue. **Besides,** food, such as corn and maize, is also the raw material for industries. Researches find that, elements of corn are found in tens of kinds of industrial products, including capsules, paper and even batteries. After corn is harvested, the stalk and leaves can also be used to produce biofuel. **In the sense of food processing,** consumers benefit from improved tastes and greater variety of choices of foods which are far less perishable than fresh and seasonal food. **All these make convincing arguments for supporting modern food technologies.**

From my perspective, pressing as some of the problems are, they can be settled by further development in technologies. Therefore, in general, I am optimistic about the future application of food-related technologies, believing that they will continue to contribute to the well-being of the general public.

二元: 平衡式

Many people work at home using modern technology today. Some people think only workers benefit from it, while others think employers benefit as well. Discuss both views and give your own opinion.

Progressions in telecommunications technology have enabled the practice of telecommuting, which means workers can conduct their assigned tasks without having to commute back and forth to work regularly. This emerging working pattern has profound implications on our work and life. Some assert that only workers, not the employers, can be beneficiaries of telecommuting. Personally, I cannot go along with their view.

Granted, telecommuting can bestow numerous benefits upon the employees. To begin with, employees do not have to live with the constant fear that their boss may look over their shoulders, as their work is supervised from far away and in more laissez-faire fashions. There is no need for them to get super well-groomed and they can “slack off” a bit when the work-induced stress is too intense to bear. They can even do aerobics or take showers to refresh themselves provided they can meet the deadline set by their bosses. Furthermore, telecommuting can spare workers the everyday chore of traveling back and forth to work. And this, in turn, helps them to cut down on costs of bus fare, fuel or extravagant work clothes. Lastly, telecommuters can dedicate far more time to their spouse and children than office-bound workers. This can, doubtlessly, strengthen their family ties or may even salvage dysfunctional households.

Yet it would be erroneous if we fail to acknowledge the advantages telecommuting can confer on the employers. In the first place, less constraints, less peer pressure at work, no office politics and more flexible schedules can boost employee morale and enhance productivity. Empirical evidence abounds in this respect that more occupational freedom can, more often than not, lead to stronger vocational motivation and more innovative ideas. Hence, employers may well be better off not keeping tabs on their workers nine to five every weekday. In the second place telecommuting work force can help business-owners substantially curtail the overhead costs, such as the costs of rent and utilities. Thirdly, the fact that workers can telecommute via the worldwide communications network allows employers to recruit people from remote locations or even half way around the globe, thereby markedly augmenting the labor pool of businesses. Last but not least, employers will not be plagued by petty concerns such as absenteeism and excessive sick leaves anymore if workers telecommute.

To conclude, I concede that telecommuting can bring about a variety of boons to employees. However, it would be unjustifiable if we overlooked the advantages telecommuting can spawn on the employers' side. And we should strive to seek out the most effective approach to exploit this win-win situation.

讨论两边后自己观点独立一段:

Topic: As computers are being used more and more in education, there will be soon no role for teachers in the classroom.

There is no doubt that education and the learning process has changed since the introduction of computers: The search for information has become easier and amusing, and connectivity has expedited the data availability. Though experts systems have made computers more intelligent, they have not yet become a substitute of the human interaction in the learning process. In my opinion; what can be expected, is a change of the teachers' role but not their disappearance from the classroom.

Nobody can argue that the acquisition of knowledge is more fun and easier with computers. The mere activity of touching and exploring this device constitutes an enjoyable task for a kid. This, accompanied with the relaxing attitude and software interactivity, usually conduce to a better grasping of new knowledge. At a higher educational level; the availability of digital books, simulator and other academic materials, provide the student with an ever accessible source of information, that otherwise would not be at hand.

However, besides the increasing complexity and behavior of intelligent software, which is usually embedded

in the academic digital material, **the need of human interaction in the learning process will always be present**, at least in **the foreseeable future. There is the necessity for** a human being to be able to determine what the specific needs of each individual are. The expertise of a teacher in how to explain and **adapt** complex concepts **to** different individuals can hardly **be mimicked by** a computer, **no matter how** sophisticated its software is.

As computers are becoming a common tool for teaching, teachers should **be more aware of** their role as guides in the acquisition of knowledge rather than transmitters of facts. They have to be **open minded to** the changes that are taking place, **keep updated** and serve as a problem solvers in the learning process, thus allowing students to discover the fact for themselves.

To summarize, in my personal view, teachers play and will **play an important role in** the classroom, especially at the primary level. **No matter how** complex computers **become**, **there will be no** replacement for the human interaction, but **in the way** how this interaction takes place.

B 好+B 坏+A 好

Some people say that the government should provide sports facilities to improve public health. However, others believe that this has little effect, other measures should be used for the purpose. Discuss both these views and give your personal opinion.

A problem of modern societies is the declining level of health in the general population, with conflicting views on how to tackle this worrying trend. One possible solution is to provide more sport facilities to encourage a more active lifestyle.

Advocates of this believe that today's **sedentary lifestyle** and stressful working conditions mean that physical activity is no longer part of either our work or out leisure time. **If there were easy-to-reach local sports centres, we would be more likely to make exercises a regular part of our lives, rather than just collapsing in from of a screen every evening.** The variety of sports that can be offered would **cater for** all ages, levels of fitness and interests: those with painful memories of PE at school might be happier in the swimming pool than on the football pitch.

However, there may be better ways of tackling this problem. Interest in sport is not universal, and additional facilities might simply attract the already fit, not those who most need them. Physical activities can be encouraged relatively cheaply, for example by installing exercise equipment in parks, as my local councils has done. This has the added benefit that parents and children often use them together just for fun, which develops a positive attitude to exercise at an early age.

As well as physical activity, **high tax penalties** can be **imposed** on high-fat food products, tobacco and alcohol, as **excessive consumption** of any of these leads to poor health. Even improving public transport would help: it takes longer to walk to the bus stop than to the car.

In my opinion, focusing on sports facilities is too narrow an approach and would not have the desired results. People should be encouraged not only to be more physically active but also to adopt a healthier lifestyle in general.

练习：根据下列破题和结构图完成框架型句子

一元题 Model: *Some people think money spent on the protection of wild animals is a waste, others think the need to do so is urgent. Discuss both views and show your opinion.*

eco-balance	biological resources	inspire human inventions
drain much needed public funds	compete for space & resources	

平衡式	开头	现象:野生动物数量在减少,政府花了很多资金用来保护。虽然这个现象带来了问题,好处是深远的。
	坏处	保护野生动物引发了一些问题。第一,政府要花大量的资金。(拓展)第二,动物跟人类竞争有限的空间和资源。(拓展)
	好处	保护野生动物的必要性主要体现在三个方面。第一,保护野生动物维护生态平衡。(拓展)第二,野生动物为人类的许多产业提供原材料。(拓展)第三,野生动物启发了人类的发明创造。(拓展)
	我的观点	我个人认为,虽然动物保护引发了许多问题,这些问题是可以被政府立法和监管解决的。因此,我同意保护野生动物。

开头最后一句 (thesis statement)

1. Despite the fact that _____

_____ (一系列的问题被野生动物保护引发), there are profound reasons (深刻的理由) to do so.

2. Although _____

_____ (野生动物保护带来各种各样的问题), _____

_____ (它同时也带来了很大的好处。)

每段的主题句：

1. _____ (承然), the problems that come in the wake of (随...而来) animal protection are multiple.

2. _____ (话虽如此), wildlife _____ (起到重要作用) in both the eco-system and human life.

结尾段写自己的观点：

1. _____ (在我看来), problematic as animal conservation may be, these problems can be tackled with by _____ (政府的合理规划和管
理)。With this in mind, I am firmly convinced that protective measures of animals are not only desirable but also essential.

2. All things considered, although protecting wildlife brings forth disadvantages to the human race, these _____ (可以被弥补) by the multitude of benefits we reap from it. Judging from this (鉴于这一点), it is advisable that efforts be made to ensure their survival.

二元题 Model: *Some people think that public libraries should only provide books, while others believe high-tech media such as DVD, videos and software should be encouraged. Discuss both these views and give your own opinion.*

1.more appealing\interesting\attractive	1. gear to\meet the needs of all age groups: less technology-savvy
2. eco-friendly	2. protect copyrights
3. digital information: easily transmittable \less space	3. involve less costs

平 衡 式	开头	现象：纸制的书正在被电子材料替代。许多公共图书馆都在减少书籍的储量，而且建立电子图书馆。虽然电子材料有多种好处，纸制书的存在还是有必要的。
	B 的好处	电子材料的好处是很明显的。第一，它更加有趣。（拓展）第二，它环保。（拓展）第三，电子格式的数据非常方便。（拓展）
	A 的好处	这不代表纸制书应该被完全替代。第一，纸制书迎合各种人群的需求。（拓展）第二，纸制书保护版权。（拓展）第三，购买纸制书的投资更少。（拓展）
	我的观点	电子材料可以成为一种额外的选择，但不应全面替代纸制书。

开头最后一句 (thesis statement)

1. _____

2. _____

每段的主题句：

1. It makes sense to state that _____
_____ (图书馆应该提供电子材料) , which brings forth multiple advantages.

2. Nonetheless, this does not mean that _____
_____ (纸质书应该完全被替代)

结尾段写自己的观点：

1. _____ (在我看来), it is a trend that paper books will be phased out (淘汰)。In concern of the environment and readers' convenience, it is far more reasonable to provide electronic materials.

2. Whether libraries should provide electronic materials or paper books _____ (取决于, 由。。定, 可以用 be dependent on, hinge on, be determined by, be subject to) their main reader groups. Given that there are a fairly large number of readers who are digital immigrants, paper books should not be phased out.

3. On balance, both paper books and electronic materials cater to the needs of certain groups of readers. Therefore, _____
_____ (应该) that the libraries provide access to both formats of information.

作业

Some people believe that they should be able to keep all the money they earn and should not have to pay tax to the state.

To what extent do you agree or disagree?

破题

People work hard and earn money which ideally they would like to retain for themselves. However, a significant portion of this usually has to be given to the state. In my view, it is right that people pay their fair share of taxes.

Money is everything in today's livelihoods. This is because money is used to buy all the necessities such as food, water, and shelter. Money is also used to help a family's children in the form of school fees and other activities. In addition to this, people do not only need money to cater for their necessities, but also for future investments. The more that people have to invest, the more they believe they can accumulate in the long term. As a result, many are reluctant to lose some of their income through the deduction of tax.

Nevertheless, citizens should be obliged to pay taxes to the government for a number of reasons. They should accept that the taxes they pay help the government offer them the public services all over the country. These public services are things such as the construction of roads, bridges, public hospitals, parks and other public services. The same tax money helps the country's economy to be stable. Through taxes, the government can pay off its debts. In short, tax money is a way of ensuring that people have comfortable livelihoods.

In conclusion, even though many people think that they should not pay taxes, that money is useful to the stability of any country. Therefore, people should not avoid paying taxes as it may affect the country's economy and services that it provides.

Some experts believe that it is better for children to begin learning a foreign language at primary school rather than secondary school. Do the advantages of this outweigh the disadvantages?

破題

primary school	Secondary school

Traditional, children have begun studying foreign languages at secondary school, but introducing them earlier is recommended by some educationalists. This policy has been adopted by some educational authorities or individual schools, with both positive and negative outcomes.

The obvious argument in its favour is that young children pick up languages much more easily than teenagers. Their brains are still programmed to acquire their mother tongue, **which facilitates learning another language and unlike adolescents,** they are not inhibited by self-consciousness.

The greater flexibility of the primary timetable allows for more frequent, shorter sessions and for play-centred approach, **thus maintaining learners' enthusiasm and progress.** Their command of the language in later life will benefit from this early exposure, while learning other languages subsequently will be easier for them. They may also gain a better understanding of other cultures.

There are, however, some disadvantages. Primary school teachers are generalists, and may not have the necessary language skills themselves. If specialists have to be brought in to deliver these sessions, the flexibility referred to above is diminished. If primary language teaching is not standardized, secondary schools can be faced with a great variety of levels in different languages within their intake, **resulting in a classroom experience which undoes the earlier gains.** There is no advantage if enthusiastic primary pupils become demotivated as soon as they change schools. However, these issues can be addressed strategically within the policy adopted.

Anything which encourages language learning benefits society culturally and economically, and early exposure to language learning contributes to this. Young children's innate abilities should be harnessed to make these benefits more achievable.

Some people say that the government should provide sports facilities to improve public health. However, others believe that this has little effect, other measures should be used for the purpose. Discuss both these views and give your personal opinion.

完成作文

1. _____

Although providing facilities for exercises is conducive to strengthening public health to a certain extent, it is not an elixir(灵丹, 万能药) to all health problems. Other measures are still desirable.

Some people are strong advocates of setting up more sports facilities as it can create a good environment for people to work out. _____

Some people hold the opposite view that the above-mentioned way may not markedly improve public health for most people actually do not pay attention to their own health conditions, let alone do sports. For instance, people, especially in urban areas, are always occupied in working or study in modern society nowadays, leading that many of them ignore the significance of health. In this case, they would not do regular exercises even though more sports facilities were to be built.

From my perspective, _____

Keys:

1. Building more sports facilities is regarded as the best solution to public health problems.
2. It is a fact that a number of people are not able to get enough physical training because of the lack of sports facilities. And by increasing the number of sports facilities, better sports conditions would be exposed to the public. For example, people in the countryside or other underdeveloped regions do not even have a playground or a basketball court, making it difficult for them to do exercises. Therefore, if more sports facilities are built, more people will be attracted to do sports.
3. It may not radically get public health improved if only the number of sports facilities is increased. Some other measures that encourage people to have a healthy lifestyle, such as giving up smoking, eating less and exercising more and going to bed early at night, may be more useful. Once people realize the importance of it, they would be proactive to abandon their bad habits and build up their bodies.

完整写作题：

Some people think citizens should be totally responsible for their own health costs. Others think it is better to have a health care system which provides free health services for all. Discuss both these views and give your own opinion.
