表达立场式的作文

Task		Timing	What do I have to do?
Academic Writing	1	20 minutes	Describe visual information (e.g. a diagram, chart, graph or table).
	2	40 minutes	Write an essay. You may be asked to: • provide a solution • evaluate a problem • compare and contrast different ideas or opinions • challenge an argument or idea.

1. 看提问，判断题目类型

Argumentative essay: 议论文

平衡议论

- Discuss both views and give your opinion?
- Discuss the advantages and disadvantages and give your opinion?
- Do the advantages outweigh disadvantages?

立场议论

- Which one do you agree?
- Do you agree or disagree?
- To what extent do you agree or disagree?
- What is your opinion?
- What do you think?

2. 头脑风暴

Ex1: 一元例题 : *Some people think art such as painting and music cannot improve the quality of people's life, the government should not spend money on it but the other fields. Do you agree or disagree?*

Art bears on people's minds. civilise a nation\ make people more cultured children: shape character\ develop intelligence	basic needs: human right
bring in tourist revenue: create job openings, statues, galleries, exhibitions	Upper-class : are more likely to be beneficiaries to art programmes
Preserve traditional culture: unique art forms	

Damage to the environment is an inevitable consequence of the improvement of the living standard. Do you agree or disagree?

Ex2: 二元题例 : *There are a higher proportion of older people than younger people . Do you think it is a positive or negative development?*

Young	The elderly
Economic benefits to the nation ✧ labor force: tax-payers ✧ consumers: especially culture industry	relatively more virtuous
Fit better in modern work places ✧ physically superior to the old ✧ intellectually capable to deal with modern work	more experienced
Boost scientific growth: ✧ creative, innovative ✧ willing to take risks	

Some people say that nowadays machine translation is highly developed, therefore it is not necessary for children to learn foreign languages. Do you agree or disagree?

Opening paragraph	Position:
Second paragraph	
Third paragraph	
Fourth paragraph	
Closing paragraph	Restate position:

表达立场式的作文结构

水滴式

一元题

开头：我支持 A

承认 A 的坏

A 的好第一点

A 的好第二点

结尾：A 不但...而且...
所以我支持 A

二元题

开头：我支持 A

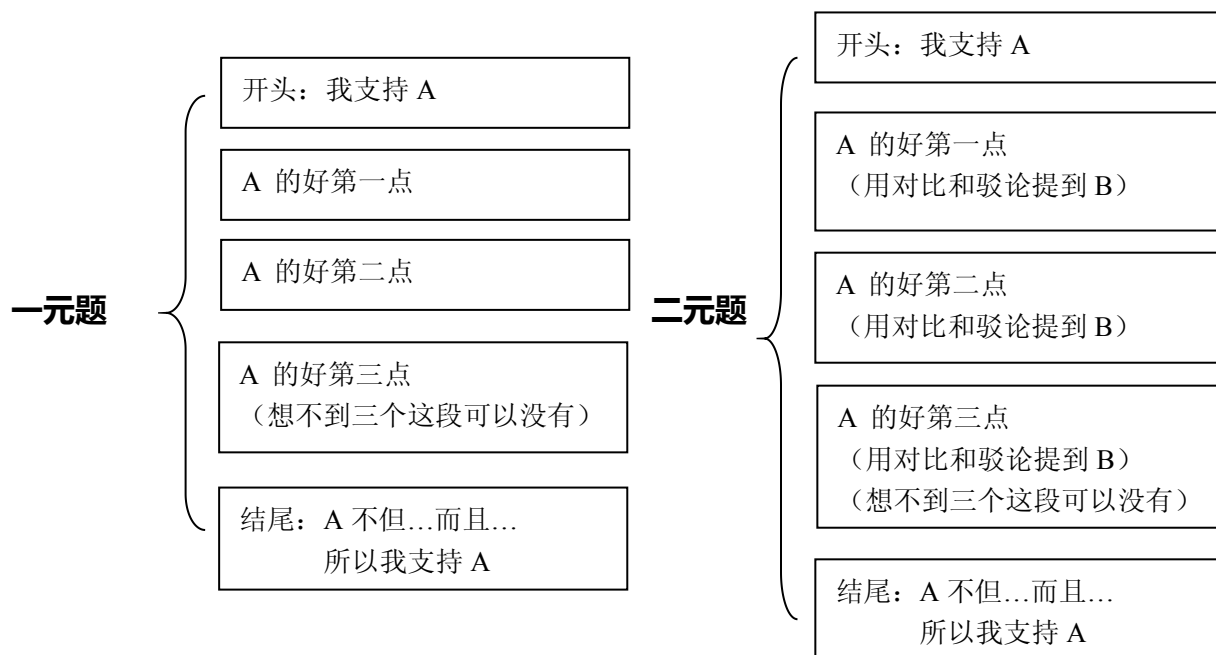

承认 B 的好

A 的好第一点 或 B 的坏

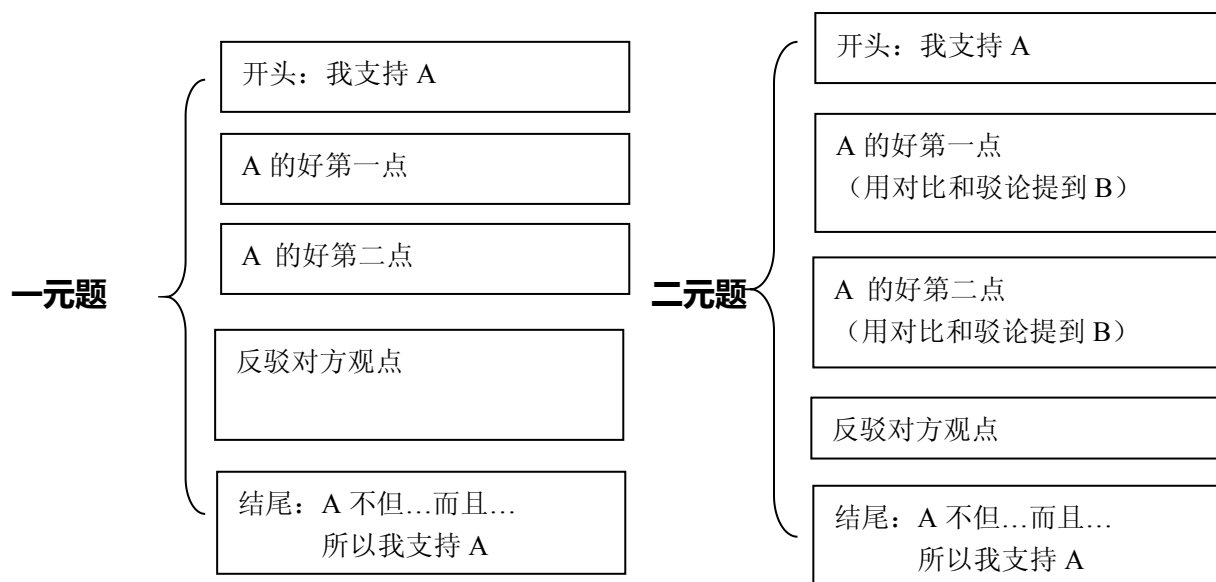

A 的好第二点

结尾：A 不但...而且...
所以我支持 A

一面倒

反驳式

Academic Writing: Task 2

➤ Topic: Upbringing

You should spend about 40 minutes on this task.

Write about the following topic:

Children who are brought up in families that do not have large amounts of money are better prepared to deal with the problems of adult life than children brought up by wealthy parents.

To what extent do you agree or disagree with this opinion?

Give reasons for your answer and include any relevant examples from your own knowledge or experience.

Candidate Script

I do agree to the statement that children brought up in poor families are better prepared to deal with the problems of adult life than children brought up by wealthy parents.

Children of poor parents are prematurely exposed to the problems of adult life eg. ~~earning a living~~ learning to survive on a low family income ^{and} sacrificing luxuries for essential items. These children begin to see the 'realities' of life in their home or social environment. Their parents' own struggles serve as an example to them.

These children are taught necessary skills for survival as an adult from a very early age. Many children eg work in the weekends or holidays to either collect some pocket money or even contribute to their families' income. A good example is the many children who accompany their parents to sell produce at the market. They are making a direct contribution to their families in terms of labor or income.

Children of poor families also are highly motivated. They tend to set high goals to improve their ^{economic & social} situation. A relevant example would be Mr Bill Gates (founder of Microsoft Corporation). He had an impoverished background but he used his talent and motivation to set up the world's largest computer organisation.

However, there are some problems that children from poor backgrounds do encounter. Many of these children who are 'robbed' of their childhood ^{by} while working, may feel cheated. They often turn to crime. This however, is a small group.

In summing up, children with impoverished backgrounds are able to deal with problems of adult life because of early exposure, family role models and sheer motivation.

Some people say that nowadays machine translation is highly developed, therefore it is not necessary for children to learn foreign languages. Do you agree or disagree?

First and foremost, foreign language proficiency facilitates children's future life in miscellaneous ways. In career life, for example, foreign language competence can be a highlight in one's CV, winning the candidate more opportunities over those monolinguals to survive in the jungle of job-hunting. By the same token, for those working in ethnically-diverse backgrounds (eg. in a transnational company), the mastery of another language is a prerequisite to immediate communication like a discussion. In terms of leisure life, multilingual people, obviously, have a wider range of choices in holiday destinations, books to read, movies and TV programmes.

Also, language learning trains the brain to perform mental gymnastics. Learning a new language entails a vast amount of mental activities: learners have to memorize new vocabulary, comprehend sentences, analyze complex sentence structures, synthesize bits of information, evaluate arguments and articulate abstract ideas (as in writing), which conduces to better intellectual abilities. Simply put, the brain is fired up when people learn new languages. Interestingly, linguistic researches indicate that the incidence of Alzheimer's among bilingual subjects is considerably lower than the corresponding figure among their monolingual counterparts. On this account, foreign language learning gives children brain workout, thus rendering assistance to the learning of other subjects as well.

Machine translation may not be entirely reliable. Due to technological limitations, machine intelligence is still at the infant stage. Accordingly, the idea that machines can process language as accurately as the human brain does can be easily debunked. It still mystifies scientists how the human brain recognizes overtones, puns and satires, to name but a few. Despite the fact that machines can already successfully translate or even interpret technical terms and short sentences, the translation of literary discourses is still off their limits. Also, given that the mistake rate of machine translation is high, it can not serve the purpose of translating documents of importance like government archives and legal papers.

中间段落写作

段落基本结构：汉堡包结构

Topic sentence (the main idea of the paragraph) 主语句要求：短，有个arguable point, 一般包括元
Supporting sentences (explain the idea) 基本段落拓展手段包括：分层，阐述，举例，对比，驳论，事实数据，假设，因果
It's better to use the last sentence to summarize the paragraph or transit into the next paragraph 段落最后可以有总结或过渡的句子，也可以没有

Ex1: 根据破题思路，写出下列作文的主旨句。

- Many people use distance-learning programmes to study at home while other people think that these programmes cannot bring as much benefit as attending college or university. What is your opinion?

头脑风暴

Distance-learning programmes

Attending college or university

No geospatial constraints

(无地理空间限制)

- ✧ no need to commute\travel
- ✧ have access to a wider range of information
- ✧ spending on the construction of buildings\ cut down (curtailed)

More communicative

(更具交流性)

- ✧ teachers: raise questions, clear doubts
- ✧ fellow students: teamwork, cooperation, discussion, competition, friendship

Flexible schedules (时间灵活安排) ✧ students: preferred time\ deal with conflicting time demands ✧ employed people: improve-qualifications, do not have to give up jobs	Supervised environment (监管的环境) ✧ rules, codes of conduct, regulations, attendance
Tailor education to individual needs (个性化的学习) ✧ customized programme: cater to individual needs ✧ study at own pace: fast-learner, skip\ slow learners: repeat	Facilities and activities (设施和活动) ✧ curricular: internship, field-trips, lab work ✧ non-curricular: sport equipment and venues, societies and clubs

水滴式：

T1: 承认对方的观点

1. I concede that _____

2. The argument that _____

_____ is not completely without reason.

3. To some extent, the opinion that _____

_____ holds some truth.

4. Justifiably, _____

_____.

T2: 支撑自己的第一个理由

1. Despite this, _____

_____.

2. However, _____

3. That being said, _____

_____.

T3. 支撑自己的第二个理由

1. _____ is another benefits derived
from _____.

2. _____ (更重要的是), _____

3. _____ (除此之外), _____

一面倒:

T1: 说自己的第一个理由

1. _____ (首先), _____

T2: 说自己的第二个理由

2. _____ (其次), _____

T3: 说自己的第三个理由

3. _____ (最重要的是), _____

段落拓展策略

● 1 分层次: stratification

可以按数字分层

也可以从人，方面的角度分层

除此之外: **besides\ furthermore ...**

其一其二: **for one thing\ for another**

从。。。方面看: **in a cultural sense=in the sense of culture\culturally**

as far as sth is concerned\ as far as culture goes

\from a cultural perspective\ **culture-wise**(n.-wise)

in terms of culture= in cultural terms\

regarding culture\as to sth/sb,

from a cultural point of view

对于某人来说: **on the part of sb.**\as to sb., **as for sb.**, as with sb.\

as far as sb. is concerned

Granted, exams exert adverse effects on students, *physically and psychologically* .Having to stay up late to prepare for exams, students suffer from extreme lack of sleep which is usually accompanied by ailments like headache, upset stomach and inability to concentrate. In addition, constant waves of stress strike. The expectations from parents, teachers and even students themselves generate crushing tension that can be unbearable even to academic-achievers, let alone those who live in constant fear of not being graduated by schools.

Ex1: 用分层法拓展下列段落主旨句。

Despite this, the positive roles exams play in education and the selection of talented people should not be overlooked. To students, _____

As far as teachers are concerned, _____

On the part of organizations and companies, _____

● 2 阐述法: illustration:

一般用于细化主题句, 回答why, how, so what ,
也可用在举例后面, 把例子和论点相联系
包括概述, 详述, 简述, 转述, 提点注意力等

概述 (总得说来): in the main\ in general\by and large\ generally speaking
(通常情况下) as is often the case\ more often than not\ oftentimes

The case is often that..\ It is often the case that...

详述（具体说来）: **to specify**\specifically\ **to be specific**\ to elaborate\to expound\
to expatiate

转述（也就是说）: **in other words**\ to paraphrase\ to put it another way\
to put it differently

简述（简单的说）: to put it simple\ to simplify \b**in brief**\ in short\ to put it simple\
simply put

一般阐述（当然）: Understandably\conceivably (不难理解的是),
(很明显) explicitly\ **obviously****apparently**\evidently
(解释): **to illustrate**\ **as an illustration**\ **to elucidate**

值得注意的是: Noteworthy is that...\ It merits attention that...,
It is worth mentioning that...\ noticeably\ notably

Computers are *omnipresent and omnipotent*. (电脑无处不在，无所不能。)

To specify, they are now widely used in all aspects of our life---making digital records in banks; calculating huge amounts of data in science labs; running office documents; helping students look for essay references and enriching our leisure life with games, music and movies. To put it simple, we cannot live without it.

Ex2: 用阐述法拓展下列段落主旨句。

Compared with attending colleges and universities, distance learning programmes require higher levels of self-discipline on the part of students.

● 3 举例法: exemplification

1-2句话概括事实+合适的分析，把例子带到论点上去

例如: **for example**\ **for instance**\ **a fitting (telling) example**\ **e.g.**
to demonstrate\ **as a demonstration** \ **a case in point**
to exemplify\ **to cite ...as an example**\ **to quote ...as an example**
By way of an example,

An oft-quoted\much quoted example is that...

A good case in point is that...\ The fact that...is a good case in point.

A salient example is that...

Sth (the fact that...) gives/serves as a vivid illustration.

This can be illustrated with the example of _____.

This can be aptly exemplified by the case of _____: _____

列举: such as\ **to name but a few**\ like\including\,

..., a few typical ones being A, B and C.

Included in the list (of sth.) are A, B and C.

等等: and so on\ and so forth\ **among other things**(among other languages)
and the like

Computers can be *more intelligent than an average human*. A good case in point is Deep Blue, the chess computer. Developed by IBM on May 11, 1997, the machine won the second six-game match against world champion Garry Kasparov by two wins to one with three draws .**阐述:** Computers learn by accepting new programs which enable them to know virtually all possible human expertise. In other words, computers have more powerful brains than those of men.

Ex3: 用别的句型改写下面的例子。

Online courses render it possible for students to get equal access to quality teaching. For example, Coursera, an American online education platform, offers free education to its users. Included in the list of colleges cooperating with it are universities like Harvard, Stanford and Yale which are internationally renowned for their academic excellence.

● 4 对比法: comparison and contrast

尤其适用于二元题

相反: **in contrast**\ contrastively\ in sharp contrast to that\ **in stark contrast**
on the contrary\ to the contrary\ contrarily\ contrary to this
by comparison\ comparatively
conversely
on the flip side\..., instead,...

表示对比的句型

Men are not as _____ as women.
 Men are more _____ than women.
 Men are less _____ than women.
 While men _____, women _____.
 Unlike men (who _____), women _____.
 Different from men (who _____), women _____.
 Contrary to men.(who _____), women _____.
 Compared with men (who _____), women _____.
 Men _____, instead of _____.
 Women _____, rather than _____.
 Men are different from women, in that _____.
 What separates (differentiates)men from women is that _____.

相似: likewise\ similarly\ by the same token\ in like manner

Computers *enhance the efficiency* of life and work to an extent never heard before. Before the cyber age, students used to stay for days in the library, thumbing through thousands of pages just to look for one or two paragraphs of essay references. By comparison, the same can be done by simply typing a few words in the Google search box and hitting “Enter”.

Ex4: 用对比法拓展下列段落主旨句。

Unlike internet-based education, colleges and universities provide activities and facilities to support students’ learning. A case in point is that

In contrast, _____

5 驳论法: refutation

驳论可以在段落中间，也可以单独成段

诚然: granted\ admittedly\indeed\ it is fair to say that\ it is true that...

不用说: **needless to say\ undoubtedly\ indisputably**

貌似: **seemingly\ ostensibly**

提别人观点: **It is mentioned that...**

It can be argued that...

An opinion has it that...

It is generally argued that...

It is on many people's lips that...

但是: **nonetheless\ nevertheless\ notwithstanding\ however\ that being said\ despite this\ in spite of this**

表示转折的句型

{ **Although** _____, _____.
_____, **though** _____.

{ **Despite the fact that** _____, _____.
In spite of _____, _____.

形容词倒装

{ **Serious as the problem seems, it can be solved by collective efforts from the government and the community.**
Omnipotent as the Internet is, it has a collection of innate problems.

Albeit 句型

{ **He finally agreed, albeit reluctantly, to help us.**
Albeit difficult, the job is getting done.
Albeit fair, the girl was not sought after.
The Backspace key is really an Undo function, albeit a special one.

段内驳论:

Information can be easily retrieved by the use of computers. As an all-seeing eye and an all-knowing mind, a computer gives answers to questions regarding all topics under the sun. Information ranging from weather forecast and travel tips to stock market indices and research findings is just a click away. Although there is the problem of unauthorized information streaming, stringent measures like copyrights laws are being taken to regulate the behaviors of search-engine providers and information seekers.

驳论段:

The understanding that computers are treasure troves of information can be mistaken. Granted, computers present a wealth of information to us. Nonetheless, correspondingly, the time we use to browse over this information multiplies. Type any

word in the search-box, one will get thousands of results, some of which are just loosely relevant to the key words. Then, much more time is needed to open the pages and check for relevance. The result is often that not much can serve our purpose out of the mass of information.

It is *falsely believed* that e-books are *more eco-friendly* than traditional paper books. Seemingly, millions of trees are saved by the substitution of printed books with electronic books, which, in turn, helps to relieve the problems of soil erosion and desertification. The truth, however, is that other forms of pollution come in the wake of the popularity of e-books. Firstly, the need for batteries, widely acknowledged as polluting, shoots up. Also, as more electricity is consumed when people read e-books on their computers, the problem of air pollution from energy production is intensified.

常见驳论词：mistaken, false, **unjustifiable**, questionable, fallacious, unwarranted, erroneous, tenacious, **untenable**, **cannot hold water**, **be not compelling**, be not convincing, be not without flaws, far-fetched

Ex5: 按要求拓展下列段落主旨句。

段内驳：To begin with, face-to-face teaching which is delivered to a group of students is more communicative than studying online.

To specify _____

Furthermore, _____

虽然不是每个学生都有同等机会参与讨论，很多人在课堂上是沉默的。但是他们从别人的发言里可以获得好处，对话题有更深入的认识。

Key: Although students may not get equal opportunities to participate in classes, they reap benefits from listening to others' launching their opinions, which helps them to have in-depth understanding of the topics discussed.

● 6 因果法: Cause and effect

因此: **therefore \ thereby \ thus \ consequently \ as a consequence \ hence \ as a result**

结果是: **the ramification**(某种行为的结果) **is that...**

这么一来: **as such \ in effect **

因为这一点: **by this logic \ on that account**

理由是: **The explanation is that... \ This is because...**

An underlying reason is that... \ A compelling reason is that...

- 从句表达 (基本句型)

As _____, _____.
Since _____, _____.
_____, for _____.
_____, because _____.
_____, for the reason that _____.
The reason why _____ is that _____.
_____, in that _____.

_____, because of _____.
Due to _____, _____.
Owing to _____, _____.
Resulting from _____, _____.
On account of _____, _____.
As a result of _____, _____.
As a consequence of _____, _____.
_____ by virtue of _____.
Thanks to _____, _____ (只能表示好的东西)

_____, resulting in _____.
_____, which _____
_____, thus doing sth.
_____, in turn doing sth
_____, which is ultimately why _____.

Computers break down geospatial distance among people. (电脑打破了人与人之间的地理空间距离) The virtual world created by computers and cybernetics is an extension of real life. People living online no longer have to go out to accomplish things. As so, great convenience can be enjoyed and loads of time can be spared. More significantly, time saved on the way can be devoted to worthier goals.

例段分析 1:

There are certainly other factors that make work more enjoyable. One is having friendly colleagues. When we like the people we work with, we invariably form stronger bonds with them, in turn building trust. What this means is that they are potentially more likely to support us at work when we need them. Another is finding challenges that motivate us. Steve Jobs, for instance, one of the founders of Apple, was famous for launching new products. As such, he created iconic devices such as the iPhone, which is ultimately why he found his career so fulfilling.

例段分析 2:

Nevertheless, I feel that we need to prioritise prevention. One reason for this is governments arguably have a moral obligation to preserve the planet for future generations. If they introduce strict regulations to reduce harmful greenhouse gases, they can force pollution emitting industries to become carbon neutral, in turn limiting and possibly arresting global warming. What this can do is potentially restore balance to many ecosystems. Another compelling reason is that a lack of prevention could be catastrophic. Hurricanes, for instance, which are increasing in intensity and frequency, cause immense destruction. As such, they displace millions, causing famine and disease, and cripple economies, which is ultimately why trying to stop further devastation is imperative.

结果链(consequence chain)常用的表达方法:

a) Using 'which'

Firstly, fast food is available almost everywhere, which means people cook less at home.

b) Using 'and' or 'and therefore'

Firstly, fast food is available almost everywhere, and therefore, people cook less at home.

c) Using 'because'

Firstly, people cook less at home because fast food is available almost everywhere.

Apple, for instance, spends billions every year on research. As such, it creates products that have been planned to a high level of detail, which is why it sells more tablets than any of its competitors.

We can use many expressions with 'which', such as: 'which is why' (another consequence), 'which allows/enables' (gives something the ability), 'which means' (consequence)

By having lower average temperatures than Shanghai, Beijing's parks are generally hard and frozen in winter, and this often leads to a lack of outdoor sports and generally less healthy residents.

注意一个特别情况:

Despite this, I believe that giving children freedom is generally beneficial for two main reasons. Firstly, and most importantly, allowing them to voice their views with fewer boundaries invariably strengthens their feeling of independence. For example, school curriculums in Australia today encourage high school students to devise their own timetables and study plans, resulting in them learning to take more responsibility for their academic success, and this ultimately plays a pivotal role in developing their assertiveness and resilience. Secondly, it motivates children to express themselves more fully, and to follow their instincts and passions. By doing so, they can exercise their creativity and truly pursue learning that inspires them, and this, in my view, contributes significantly to their wellbeing and even their future career success.

Ex6: 用因果法拓展下列段落主旨句。

Online courses help to save educational resources.

● 7 假设法:

一般要用推测性语气, 目的是更加客观, 不over-generalize

假如: if

在。。。的情况下: **in case of sth, ...** \ In case that...,

(大事件) **in the event of sth, ...** \ **in the event that..., ...** \

on the condition that... \ **under the circumstance that...**

假设: **assume that...** \ **imagine that...** \ **suppose...**

很可能: **probably** \ **presumably** \ **in all likelihood** \ **by all chance**

There is a high possibility that \ **Odds are that...** \ **It is likely that...** \

Chances are that... \ **There is a good chance that...** \

What we can expect (surmise) is that... \

What we can envisage(envision) is that...

如果不这样的话: **otherwise** \ **if not so**

Computers bring enrichment to people's leisure time. (电脑丰富了人们的日常生活)。 Imagine a day without computers, one can find what boredom means. No games, no music, no chatting with Facebook friends, no blockbusters or TV-shows. When all these choices of pastime are taken away, life can be monotonous.

Ex7: 用假设法拓展下列段落主旨句。

Students who study online are no longer ailed by conflicting time demands. Assume that _____

● 8 事实数据: facts and figures

可以模糊, 考场作文不一定给出很精准的信息来源
包括专家意见, 统计研究结果, 也可以是普遍真理, 但不能是名人名言

就像...的一样: **As illustrated by a magazine report,**
As backed by statistics from a research
As indicated by sth
According to sth,
As sth has it,
To quote from sth,

有资料显示: **Resources have it that...**
 统计数据显示: **Statistics indicate that...**
 专家指出: **Experts point out...**
 有证据显示: **Evidence shows that...**
 有研究显示: **Research findings show that...**
 是一个不争的事实: **It is a blunt fact that...**
It is beyond doubt that...
It is a well-established fact that...
It is self-evident that...

大家都承认: **Few would argue that...\ It is universally acknowledged that...**
It is generally believed that... \ By all accounts, ...
Empirical evidence shows that

不可否认的真理: **It's a tried and true rule that...\ It is an apparent truth that...**

The wide use of computers can pose potential threats. Over-dependent on computer systems, we are lack of alternative plans in case of a computer technical fault. In some cases, such problem can bring disastrous outcomes. As reported by ABC news, a computer glitch in the flight control system caused hundreds of cancellations and flight-delays in just one hour.

Ex6: 用假设法拓展下列段落主旨句。

Online education provides opportunities for employed people to further improve their qualifications and , thus, have the edge in job market.

Ex 1: 指出下列段落拓展的问题:

Children raised in needy families have stronger self-control as their parents are too poor to give presents to them. They have learned from their childhood experience that

things do not come easily and constantly. They have to save money for expensive things they want to buy. When they become adults, they will be more patient and can wait for months or even years before their needs are satisfied. In my opinion, self-discipline is an essential quality for us to succeed.

1.

2.

3.

Children raised in needy families usually demonstrate stronger self-restraint than those from affluent backgrounds. Experiences of surviving on meager incomes teach them not to take things for granted. In other words, they have to learn how to suppress desires and give up luxuries for essential items. On account of this, odds are that when they become adults, they will be more patient and can wait for months or even years before their needs are satisfied. Self-restraint, as is often the case, is an essential quality for one to cope with situations in adult life.

Ex 2: 阅读文章，并补写一个段落

Fast food is now universally available in most countries and is becoming increasingly popular. Some feel that this is a positive trend, while others do not. Which one do you agree with?

The past 50 years have seen a dramatic increase in the availability of fast food. Some laude its convenience and relatively low cost; however, **in this essay, I intend to argue that this kind of food is detrimental both to the individuals that consume it and to society at large. There are two primary reasons for this.**

First of all, it is an undeniable fact that consuming fast food to excess results in **serious health problems**. Foods such as fried chicken, hamburgers and chips, which are incredibly high in fat and salt, are responsible for such ailments as high blood pressure, obesity and heart disease. Moreover, although I certainly agree that fast food is both affordable and convenient, the cost and inconvenience of treating the illnesses it causes in later life are significant. In other words, while fast food is beneficial in the short term, its long-term effects are generally negative.

Further and even more importantly, though, some fast food chains deliberately attempts to attract **children** in order to **shape their future eating habits**. One particularly good example is the character Ronald McDonald—the bright clothes and smile of the McDonald clown are a beacon to children. Having grown up eating in

McDonalds restaurants, people are likely to continue eating there throughout their adult lives. It is also interesting to note that McDonalds provides playgrounds and frequently holds children's birthday parties in order to attract young children and their parents.

On top of posing risks to our health, the consumption of fast food also takes heavy tolls on the environment.

By way of conclusion, I believe that fast food will continue to become more popular as the pace of life increases. Given the health risks associated with this trend, I believe that public education campaigns warning people about the dangers of fast food would be warranted.

参考答案:

On top of posing risks to our health, the consumption of fast food also takes heavy tolls on the environment. 阐述: **As is often the case**, fast food is taken away from restaurants so that it can be eaten elsewhere. 因果 **As a consequence**, colossal amounts of garbage---mainly disposable tableware **are concomitant with** the popularity of fast food, 列举 **including** paper boxes, plastic bottles together with wrapping paper and straws. 分层 **To pursue this further**, natural resources are wasted to produce the tableware which is barely used repeatedly. In Asian countries, 举例 **for instance**, millions of trees are chopped down to produce chopsticks used expansively in take-away restaurants, which worsens the cases of global warming and soil erosion.

Some people think that schools should select students according to their academic abilities, while others believe that it is better to have students with different abilities studying together. What is your opinion?

1 _____

From my perspective, _____

2. Admittedly, streaming enables students to learn in an effective way. According to students' different abilities, they are taught in different ways that are more suitable for them. In the top streams, students use more difficult materials, therefore, they can learn more. In sharp contrast, teachers can explain the material more slowly to those in bottom streams. Under this circumstance, students with different academic abilities can study effectively and efficiently.

3. Despite such a fact, mixed-ability classes provide a better environment for children's all-round development. In such classes, children with different abilities study together and in turn they can learn from one another. For example, a student, who is good at academic study but weak in dancing or painting, can learn how to dance or paint from his peers. In this sense, mixed ability classes allow students to develop their abilities in different subjects instead of only academic abilities.

4. More importantly, mixed-ability classes offer students equal access to educational resources. _____

5. In the final analysis, not only do mix-ability classes conduce to wholesome development of students' abilities, they also offer fair opportunities. Judging from this,

Some people think the media should not report details of crimes to the public. To what extent do you agree or disagree?

1. With the crime rate **hovering(v. 盘旋) at high level**, the print media as well as the electronic media dedicate large proportions of their space or airtime to detailed crime coverage. Many assert that the news media should stop giving details of crimes.

Speaking for myself, _____

2. In the first place, given the mercenary(adj. 金钱的) motives behind most detailed crime coverage, it is imperative that we discourage such coverage. The principal purpose of reporter covering criminal acts is to boost newspaper circulations or television ratings; much detailed crime coverage is biased or exaggerated. It only serves to leave a multitude of citizens constantly fearful about crime.

3. In the second place, detailed reports of crimes by the press afford the potential criminals very useful learning materials. _____

4. In the third place, detailed reports of heinous crimes may traumatize (v. 给... 造成创伤) the victims of the reported crimes. The reporters rarely consult the victims before they describe details of horrific crimes to the public. Hence, such reports become **nothing more than an attempt** to satisfy the curiosity of some base minds. Without the victims' consent, graphic accounts of crimes may become nightmares to them.

Key:

1. The suggestion is justifiable in at least three ways.
2. Reporting crimes in graphic detail helps those who are in the process of plan some criminal act to perfect their plans. **Drawing on** the well-documented crime stories in the media, would-be criminals learn how to avoid the mistakes in their crime. And this may aggravate the already soaring crime rate.
5. In sum, detailed crime coverage in the media undermines our lives in several ways. I am convinced if such reports continue to go uncontrolled, it will exert even more baneful influence on individuals, communities and societies.
